

Area Information

Yokohama Station West Exit features multiple interconnected layers including underground malls, elevated decks, and commercial buildings.

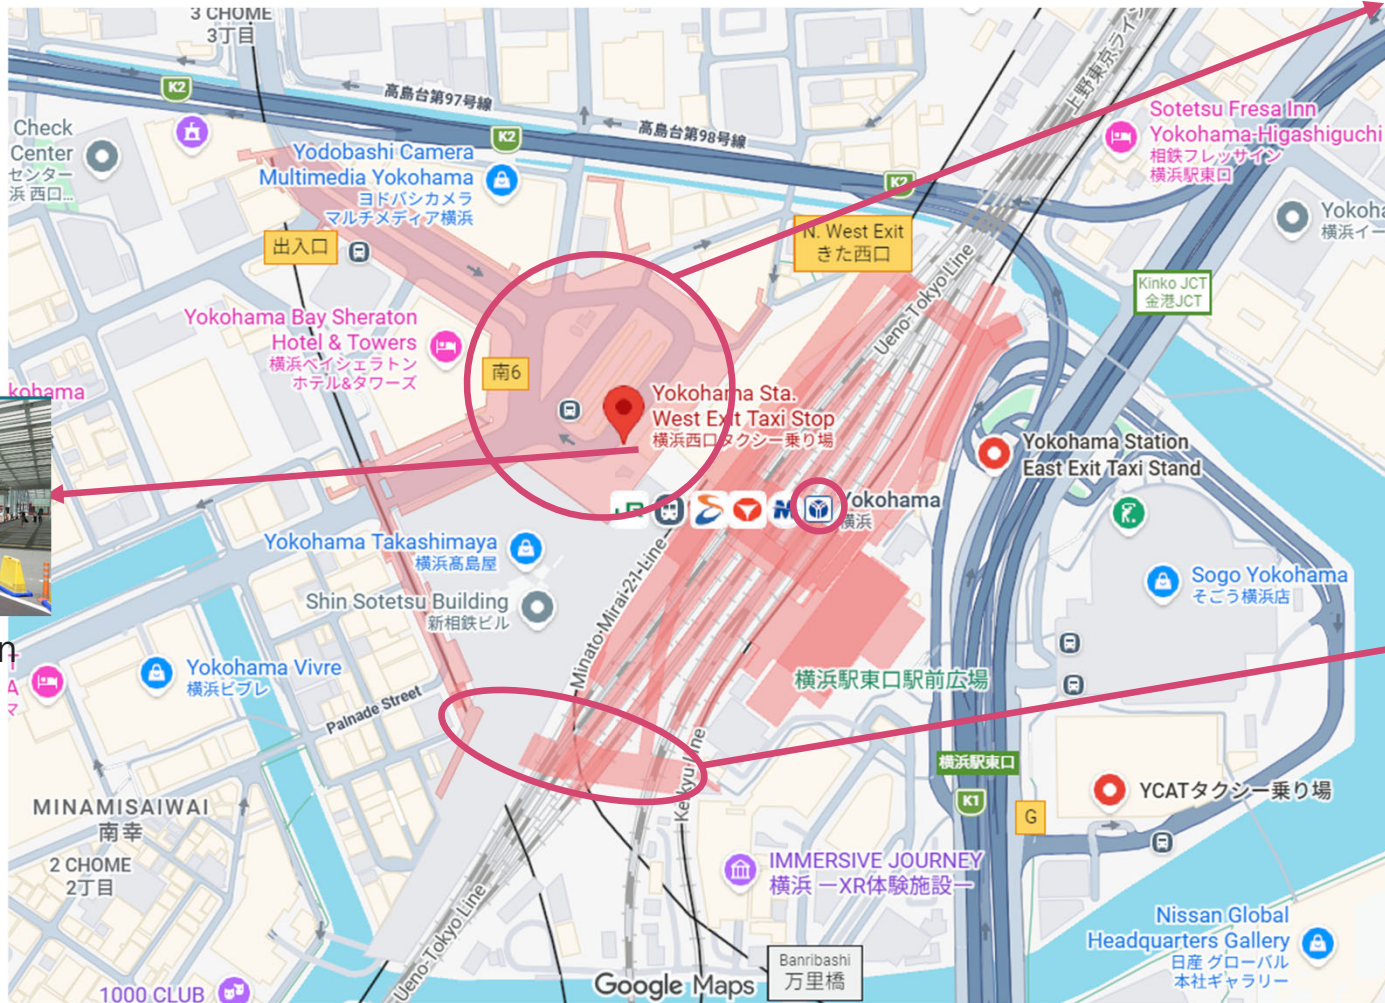

JOINUS shopping complex merges underground and above-ground retail spaces, creating a maze-like shopping environment.

Bus terminal access requires underground entry from ground level and ascending stairs or escalators to the bus stop at the ground level, which can confuse first-time visitors.

The route is complicated, so be sure to pay attention to the signs posted when walking underground or on deck walkways.
